

## Application Scope

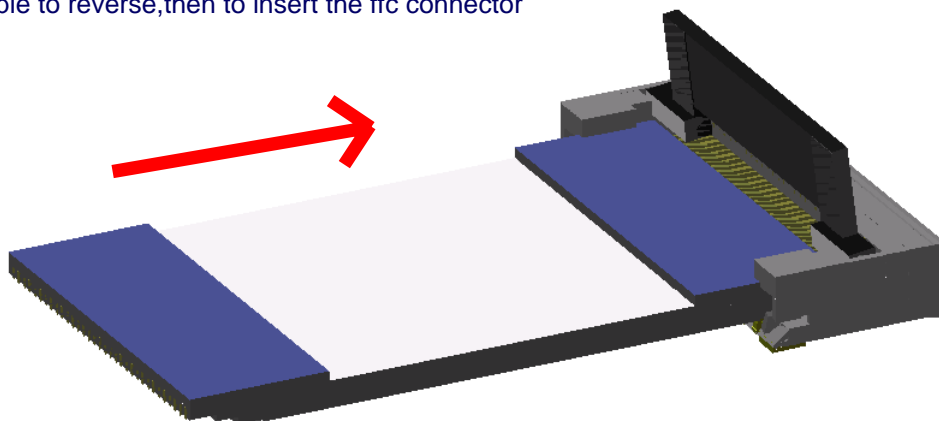

1. This kind of 0.5mm pitch LVDs ffc cable can mate with molex's LVDs ffc connector 502231 & 502244 series and Hirose's LVDs connector FH41 series.
2. Support 100Ω impedance designs for up to 1.25 Gbps.
3. Special grounding techniques to provide superior noise suppression and signal line impedance control for high frequency, low power LVDs applications such as flat panel display TVs and gaming consoles.
